

General Health Guidelines for Progressive Driving School

- We request that students and parents/guardians with signs of a fever, cough and/or shortness of breath to stay home.

*Anyone exhibiting symptoms should be asked not to book lessons and refrain from attending an in-car driving lesson so that together we can ensure a safe experience for all concerned.

- As always, Instructors should avoid physical contact with students and parents/guardians.

During times of Flu or Covid situations, Instructors, Students / Parents/Guardians may be hyper-sensitive to handshakes, thus try and avoid any physical contact at all times.

*Masks can be worn during lessons if either the instructor or student has any health issues.

- Keep “social distancing” at all times with both Instructor, students, and parents/guardians.

- Sanitizing wipes, and alcohol-based hand sanitizers should be available for the instruction vehicles: *see safety protocols.

- Do not conduct lessons if these or the following tips/conditions cannot be met.

Because of the difficult situation, we no longer will make our vehicles available for road tests, due to third party involvement (DriveTest) and the difficulty in ensuring the safety practises.

Progressive Driving School has implemented a number of safety protocols in their Training Vehicles.

*In-car hygiene is especially important to both the students and instructors. To this effect we have always used disinfectant wipes, and this will be conducted before and after each individual driving lesson regardless of the present situation.

*Our vehicles will be completely sanitised inside and where necessary outside the car.

*Clean and disinfect frequently touched surfaces daily.

- All vehicles should be thoroughly cleaned using the following with alcohol-based cleaning products:

*Everything and anything that the instructor or the student may touch inside or outside the vehicle.

- Instructors / Students are required to wash hands before and after driving lessons.

- If required, encourage frequent bathroom breaks for proper handwashing.

- If students require lessons in their own vehicles (i.e., road test prep lesson) these same standards must apply to the vehicle being used for training purposes.

Thank you for your understanding, we take our health and others seriously.
