We take pride in knowing that students of our program graduate with much more than the basics of operating a vehicle safely.

They learn from experienced **full time professional instructors** the Defensive techniques to avoid collisions that are required to survive in today's driving environment.

A driving license gives you freedom to work, live and move wherever you wish, as well as making you independent of others; it also brings with it certain responsibilities and privileges.

We know how difficult it can be for new drivers to learn, that's why our highly-trained staff exercise patience and empathy along with a positive attitude. Their passion and enthusiasm provide invaluable help in the progress of the student.

As the owner, I take pride in the name PROGRESSIVE DRIVING, it was chosen with care to emphasis the way a new driver learns. We are a local school started and developed in Thunder Bay **and not a franchise**, so we set the culture and values that create our unique program.

Our instructors go through each driving lesson in a step by step manner, so you learn at your skill level and progress to the next.

Not only have we taught thousands of people of all ages to drive since we started in 1986, we have also taught the instructors who run other driving schools in Thunder Bay; they also learned from the best.

Peter Keddie  
Course Director
